

Established in the year 2006, ALUSOL Rolling Shutter Industries, Kuwait has gone beyond the expectations with its quality products of insulated rolling shutter slats of 39, 41 55 and 77mm, with variety of colors, and boxes for rolling shutters of types 45, 90 degree and round boxes in different sizes from 150 up to 400mm and variety of colors.

Great investments made with a dynamic approach in manufacturing, logistics, and storage, which led our company to become the leading rolling shutter manufacturing company in the GCC states and MENA countries.

We are equipped with the most up-to-date European technology and high tech equipment and machinery utilizing the highest quality of raw material. We can give the customer need from assembling rolling shutters and roll-up doors or any parts he needed. In this sense we operate with the concept of hypermarket, which allows the customer to order a wide variety of materials from insulated slats, boxes, accessories, motors and controls. Our products are famous in their durability under highest hot weather conditions resisting up to 70 degree Centigrade. We produce under the British Standard, BS EN 1396, or now is been registered at GCC under GSOEN1396.

The importance of rolling shutters in the residential and commercial environment lies in the protection from sun heat with its excellent acoustic and thermal insulation, weather protection against rain, wind and storm, noise and privacy, protection against intruders and most importantly, saving electric power consumption due to the insulation from hot or cold weather conditions.

Our export department is engaged with the customers outside Kuwait, taking care of each customer to offer them the best services.

The management of ALUSOL is keen to support its all customers with better and quality products and better services, and friendly in their business relations.
